

CONTRACTOR DUMPS

Dump trailers are available in 10k, 12k and 14k models. Bed is constructed from formed 12 gauge steel with overlapping bed for double strength.

A full 30" between the fenders maximizes loading options. Our dependable scissor lift achieves critical dump angles without the high risk of bed twisting associated with direct push cylinders.

The multi function gate allows for spreading / metering of sand, gravel, mulch, etc... Split barn doors provide a wide opening for dumping coarse debris.

Fenders are braced in front and behind. Stake pockets & rub rail standard on all units. Optional retractable tarp system available.

Available Options

- *Ramps
- *Tool chest
- *Choice of color
- *Retractable dump tarp

Easily unload difficult materials with our 50 degree dump angle.
