

DECKOVER TRAILER

ProStar's Deckover Series Trailers are designed and built with attention to detail. Safety and long service life are driving factors with every ProStar trailer.

Available with wood or diamond tread-plate decking, and a gentle five foot dovetail that allows low to the ground access using the spring assisted fold up ramp system.

Available in 12,000 lb through 25,000 lb models, the length ranges from 15 - 30 ft. Gooseneck or bumper pull versions are available. Deckovers use twin 12" - 16lb I-beams for strength under the length of the bed. A gentle five foot beavertail allows low to the ground access using the spring assisted fold up ramp system. Contact your local ProStar dealer for more information.

Our decks are available in Diamond plate, white oak or treated lumber. Ramps are fold up, heavy steel & spring assisted.
