

EQUIPMENT TRAILER

These Heavy Duty equipment trailers are available in 10k, 12k and 14k models. The bed has a width of up to 82" between the fenders. This model has a raised tube bump stop, stake pockets, rub rail, and a 7k drop-leg jack standard. A 2' diamond dovetail brings the loading height closer to the ground.

Ramps are secured in place by a sliding bar. Rattling is prevented by a secondary bar that holds ramps firmly in place during transport.

Prostar's Equipment Trailers are durable and built to last. These trailers have C-channel A-frame tongue with a 2 5/16 adj. coupler. Diamond fenders and steps provide protection for lighting and tires.

Equipment trailer comes with a 2' diamond dovetail. The dovetail have ridges spaced across surface for traction points.
