

STEEL SIDED UTILITY TRAILER

Our steel and mesh sided trailers come in a variety of sizes suitable for any hauling needs.

Strong construction allows for years of dependable service.

ProStar's steel sided trailers are perfect for hauling mulch, leaves, debris etc.... The durable metal sides are made of 16 gauge sheet metal or 9 gauge expandable metal. The rail has a 2" gap around the top edge of the smooth steel sides, allowing tie down-down placement anywhere along the rail of the trailer. The bed of the trailer on the steel sided model has a tie down ring placed near each of the corners.
